

services of the VTA

I want to thank the Association for its tireless input into so many crucial industry issues. In particular, submissions to the East West Needs Assessment, to Channel Deepening project hearings, Rail Crossing safety, ports planning and heavy vehicle road pricing forums – just some examples of so much work being done by the Association to help create a better transport system in Victoria. And that's not to mention the incredible depth of the VTA's industry representation.

The Hon Tim Pallas MP, Minister for Roads and Ports

Solutions for freight and logistics business

Industry Regulations & Compliance
