

Incident Response Workshop

Thursday 22 November 2018 10.00am to 3.00pm

Heavy vehicles and buses represent around 3% of registered vehicles and 8% of vehicle kilometres travelled. However, they are involved in 18% of total road deaths and around 3% of total injuries. An individual is up to three times more likely to die in a crash where a heavy vehicle is involved. The Department of Infrastructure and Regional Development estimates the economic cost of road crashes at around \$27 billion per year.

With these alarming statistics in mind, the Heavy Vehicle Incident Management Course is designed to guide you through WHAT TO DO and WHAT NOT TO DO when a serious heavy vehicle collision occurs. Real-world case studies will be used to demonstrate the step-by-step process for responding, investigating and preventing a serious collision or incident. **Presented by Forensic Engineer Tia Gaffney who has been a member of the VTA-associated Transportation Industry Safety Group for over 5 years.**

Course Outline

- Background Investigating Crashes
- Management Plan
- The Response Phase
 - o Initial Response
 - § Communication
 - § Documentation
 - § Shared Responsibility
 - o Public Relations
 - § Internal
 - § External
 - o Human Relations
 - o Documenting the Evidence
- The Investigation Phase
 - o Road Evidence
 - § Clean up Team
 - § Enforcement
 - § Crash scene Protocols
 - o Speed Calculations
 - o GPS, Airbag 'Black Box' and Telematic Data
 - o Checklist for Success
- The Litigation Phase
- The Prevention Phase
 - o Risk Management
 - o Hierarchy of Controls (Collision Specific)
 - o Imbedding Solutions
